About graph privacy:

- We need to give priority to the data issue. We have to find two or more appropriate graph datasets to improve the effective of our system. The datasets should include a simple one for explanation and one or more others for case studies.
- We can summarize the main contributions as following:
 - Finding the best combination of the solutions.
 - Explaining to prove the effective of the processing.

1.5 Take the exam and prepare for my course report.

2 To do

- 2.1 Submit the second submission of vast.
- 2.2 Redo user studies for trajectory-privacy.
- 2.3 Collect the materials for Quality Cultivation of Postgraduates.
